

1. Sensitivity of input parameters of infiltration-on-grid in a 2D integrated hydrologic-hydrodynamic flood modeling (<https://search.informit.org/doi/10.3316/informit.T202505060001319153466008>).
2. Enhancing Fly Ash-Based Geopolymer Concrete Performance through Machine Learning: A Predictive Model for Compressive Strength and Workability Optimization (<https://cir.nii.ac.jp/crid/1390862710142343552>).
3. Performance-based concrete for carbon footprint reduction in the construction industry: A comprehensive systematic review of current progress and future prospects (https://doi.org/10.1007/978-3-031-56878-7_6).
4. Assessment of lithium-ion battery degradation and its impact on ECM using simulated impedance spectroscopy (<https://doi.org/10.1109/ECCEurope62508.2024.10751891>).
5. Influence of rubber particle source and morphology on the mechanical properties of aqua-thermally treated rubberized concrete (<https://www.kandyconference.org/wp-content/uploads/2025/06/ICSBE-2024-Volume-I.pdf>).
6. Performance of rubberized concrete when replacing coarse aggregate with chip rubber at lower replacement levels (<http://ir.lib.ruh.ac.lk/xmlui/handle/iruor/16745>).
7. Advances in Civil and Environmental Engineering Practices for Sustainable Development (<https://www.eng.ruh.ac.lk/dcee/60544-2/>).
8. Effect of Aqua-Thermally Treated Rubber Aggregate and Waste Tyre Steel Fibre on the Mechanical Properties of Rubberized Concrete (<https://ir.lib.ruh.ac.lk/xmlui/handle/iruor/16711>).
9. Digital Twin and Internet of Things Application in Construction Safety Management: A Systematic Literature Review (<https://www.eng.ruh.ac.lk/dcee/aceps-2024/>).
10. Interaction of Digital Twin Technology to the Safety of the Construction Industry: A Review (https://www.lib.ruh.ac.lk/ASUoR2024/wp-content/doc/ASUoR2024_Proceeding.pdf).
11. Pervious Concrete Pavements for Sustainable Stormwater Management: A Review (<https://ir.lib.ruh.ac.lk/xmlui/handle/iruor/16715>).
12. Exploring the Potential of Mung Bean, Cowpea, and Soy Flour and Protein Isolates as Plant-Based Meat Alternatives (<https://acrobat.adobe.com/id/urn:aaid:sc:us:05356215-3ad7-4b34-822a-8c7a1f8adf6e>).
