

1. Life-cycle assessment of novel geopolymers stabilization method in applications with expansive subgrades (<https://doi.org/10.1016/j.trd.2025.104840>).
2. Durability performance of geopolymer stabilized expansive soil incorporating novel rice husk ash-based waste derived alkaline activator (<https://doi.org/10.1080/10298436.2026.2642959>).
3. Systematic Analysis of the Impact of Data Preprocessing Techniques on Machine-Learning Model Performance: A Case Study of a Compressive Strength Prediction Model for Geopolymer Concrete (<https://doi.org/10.1061/JCCEE5.CPENG-6547>).
4. EV battery degradation assessment under standard drive cycles using simulated EIS (<https://doi.org/10.3390/vehicles7010021>).
5. Structural and Fire Performance of Cold-Formed Steel Columns Subjected to Cavity Fire in Modular Buildings (<https://doi.org/10.3390/fire8050190>).
6. Novel Methodology for resilience assessment of Critical Infrastructure considering the interdependencies: A case study in the Water, Transportation and Electricity sector (<https://doi.org/10.1016/J.IJDRR.2025.105271>).
7. Micro-tunnelling technique and its applicability for soft soils: A review (<https://doi.org/10.1080/15732479.2025.2534881>).
8. Effect of mixing time on deep cement mixing in very soft peaty clay (<https://doi.org/10.1016/j.gete.2025.100775>).
9. Thermal insulation and acoustic absorption performance of textile fibre-reinforced cement mortars (<https://doi.org/10.1016/j.jobe.2025.113128>).
10. Thermal and acoustic performance of solid waste incorporated cement based composites: an analytical review <https://doi.org/10.1007/s43452-025-01160-3>).
11. Acoustic modelling of textile fibre reinforced mortars and their sound absorption performance (<https://doi.org/10.1016/j.jobe.2025.114546>).
12. Enhancing structural integrity and crack resistance of rubberized concrete using aqua-thermally treated rubber aggregates and recycled tire steel fibers for structural applications (<https://doi.org/10.1016/j.susmat.2025.e01720>).
13. Impact of recycled tire steel fibers on the mechanical performance of conventional and rubberized concrete: A comprehensive review (<https://doi.org/10.1016/j.istruc.2025.110137>).
14. Optimizing the Mechanical Performance of Rubberized Concrete by Integrating Chip Rubber in Combination with Waste Tyre Steel Fibres (https://doi.org/10.1007/978-981-97-5944-6_30).
15. Fragility Curves for Vulnerability Assessment of Railway Infrastructure Systems in the Face of Natural Hazards (<https://doi.org/10.1061/JITSE4.ISENG-2594>).
16. Sustainability drivers and sustainable development goals-based indicator system for prefabricated construction adoption – A case of developing economies (<https://doi.org/10.3390/buildings15071037>).

17. Life cycle economic and social sustainability aspects of prefabricated construction – a systematic review towards the holistic sustainability (<https://doi.org/10.1108/CI-11-2024-0364>).
18. Metal loss defect detection and depth estimation using multi-spectral image analysis of cooling excited steel specimen with corrosion (<https://doi.org/10.1038/s41598-025-88528-w>).
19. Evaluating the Environmental Performance of Blended Cement-Based Concrete: A Comparative Life-Cycle Analysis to Derive an Environmental Score (<https://doi.org/10.1061/JMCEE7.MTENG-18273>).
20. Impact of Interlocking Connection on Reliability of Connection Under Extreme-Wind and Earthquake (<https://doi.org/10.1142/S0219455426503293>).
21. Exploring the Properties of Mung Bean, Cowpea, and Soy: Assessing Their Potential Suitability for Use in Plant-Based Meat Alternatives (<https://doi.org/10.1002/sfp2.70024>).
22. Effect of storage conditions on the physicochemical and Structural properties of spray dried milk-tea formula powders containing different lactose-to-maltodextrin and casein-whey ratios (<https://doi.org/10.1016/j.powtec.2025.121399>).
23. The effect of varying casein to whey protein ratio on physicochemical and structural properties of lactose and maltodextrin modified liquid and concentrated milk-tea blends (<https://doi.org/10.1016/j.foodres.2025.116466>).
24. Exploring the science of evacuation behavior and decision-making during large scale community evacuations: A scientometrics analysis and scoping review (<https://doi.org/10.1016/j.ssci.2025.107065>).
25. Influence of composition and tea infusion on physicochemical properties of pasteurised and concentrated Milk-Tea: Focus on protein-carbohydrate-fat interactions (10.1016/j.idairyj.2025.106420)
26. Challenges in integrating the paris agreement, sustainable development goals, and sendai framework into coastal built environments: a review of Sri Lankan context (https://doi.org/10.1007/978-3-031-75826-3_3)
