

1. Rice husk ash and nanomaterial-blended cement composites: a review (<https://doi.org/10.1007/s11356-025-37361-9>).
2. Prediction of rainfall-induced shallow landslide runout integrating hydro-mechanical slope stability analysis (<https://doi.org/10.1080/17499518.2025.2607420>).
3. Characterisation of malted milk powders enriched with bioactive compounds by germinated rice, maize, and green gram (<https://doi.org/10.1093/ijfood/vvaf195>).
4. A scoping review and analysis of green construction research: a machine learning aided approach (<https://doi.org/10.1108/SASBE-08-2023-0201>).
5. Exploring the science of evacuation behavior and decision-making during large scale community evacuations: A scientometrics analysis and scoping review (<https://doi.org/10.1016/j.ssci.2025.107065>).
6. Influence of composition and tea infusion on physicochemical properties of pasteurised and concentrated Milk-Tea: Focus on protein-carbohydrate-fat interactions (<https://doi.org/10.1016/j.idairyj.2025.106420>).
7. Structural, and Functional Characterisation of Texturized Mung Bean, Cowpea, Soy Flours, and Soy Protein Isolates for Meat Analogue Applications (<https://doi.org/10.1016/j.foostr.2026.100528>).
8. An Interpretable Machine Learning Framework for Thermal Conductivity Modelling of Fiber-Reinforced Cementitious Composites for Sustainable Building Insulation Applications (<https://www.concrete.org/publications/internationalconcreteabstractsportal.aspx?m=details&ID=51751900>).
9. Advancing Sustainable Construction with Recycled PET Fiber-Reinforced Concrete Optimization (<https://doi.org/10.1061/JMCEE7.MTENG-22527>).
10. Durability performance of geopolymer stabilised expansive soil incorporating novel rice husk ash-based waste derived alkaline activator (<https://doi.org/10.1080/10298436.2026.2642959>).
11. Performance indicators and strategies for sustainability enhancement in Australian-prefabricated construction: a case study-based content analysis (<https://doi.org/10.1080/23789689.2025.2538961>).
12. Machine Learning-Driven Resilience Assessment: Integrating Dynamic Bayesian Networks and Machine Learning for Predicting Critical Infrastructure Resilience against Disasters (<https://www.taylorfrancis.com/chapters/edit/10.1201/9781003567332-14/machine-learning-driven-resilience-assessment-bawantha-rathnayaka-dilan-robert-varuna-adikariwattage-chandana-siriwardana-sujeewa-setunge>).
13. Textile-Based Materials for Carbon Dioxide Capture: Current Advances and Future Perspectives (<https://doi.org/10.21203/rs.3.rs-9394347/v1>).
14. Robust Multi-Level Forecast-Based Anomaly Detection for Smart Grid Overload Attacks (10.1109/TSUSC.2026.3696332).
15. Advances in coatings and self-healing materials for concrete sewer infrastructure corrosion protection (<https://doi.org/10.1016/j.porgcoat.2026.110496>).

16. Data-Driven Framework for Identifying Representative Pore Size in Pervious Concrete through Mix Design Parameters (<https://doi.org/10.1061/JMCEE7.MTENG-23761>)
17. Global Perspectives on Occupational Health and Safety Challenges in Library Profession (DOI: 10.4038/sllr.v40i1.88)
